ADVANCE MEDICAL DIRECTIVE

If the time comes when I am incapacitated to the point when I can no longer actively take part in decisions for my own life, and am unable to direct my physician as to my own medical care, I wish this statement to stand as a statement of my wishes.

Most of what I state here is general in nature because I cannot anticipate all the possible circumstances of a future illness. I want those making decisions for my care and on my behalf to avoid anything that intends or directly causes my death by deed or omission.

I, ____________________________, the author of this document, direct that nothing should be withheld from or provided to me by which death is intended as an end or chosen as a means. Medical treatments may be forgone or withdrawn if they do not offer a reasonable hope of benefit to me or if they entail excessive burdens, or impose excessive expense on my family. There should be a presumption in favor of providing me with nutrition and hydration, including medically assisted nutrition and medically assisted hydration, so long as they are a benefit to me. I have no objection to the use of medication or procedures necessary for my comfort even if they may indirectly and unintentionally shorten my life.

I hereby add the following special provisions regarding my future health care (for example, “I would like my tissue and organs to be used for research or transplants after I am dead” “I would like all reasonable steps to be taken to allow me to see my family” “If possible I would like to die at home, or at least in a hospice that has the appearance of a home setting”).
